Case Study: Delivering automation control services, electrical connections, and overall project management for Constitution Place Building - Canberra

Client Background

BMAC Window Furnishings (BMAC) has established itself as a leader in the commercial sector, specialising in meeting diverse client needs in areas such as government, health, education, hospitality, aged care, and accommodation. With a commitment to exceeding customer expectations through professional service, competitive prices, and quality products, BMAC has consistently thrived on challenging commercial projects.

Project Requirement

BMAC, a major player in the commercial field, approached Boosst Electrical, Data, and Security (Boosst EDS) with a prestigious and strategic project at Constitution Place in Canberra. The project involved the installation and commissioning of 623 Single and Double Roller Blinds. The key requirements were professional electrical expertise, automation skills, and the ability to deliver within the allocated budget and timeline.

The Managing Director of BMAC, Ben McCallum, emphasised the need for excellence in execution. The project at Constitution Place was not only about delivering functional window furnishings but also about showcasing BMAC's capability to potential clients. The brief was clear – the project had to be a testament to BMAC's ability to produce and deliver outstanding results.

Leigh Bradbury, Managing Director of Boosst EDS, and his team were handpicked to partner with BMAC on this critical project. The scope included providing automation control services, electrical connections, and overall project implementation.

A Challenging Project that was Completed on Time and Within Budget

Boosst EDS embraced the challenges presented by the Constitution Place project. The team, aligned with the project plans and scope, worked diligently to ensure the installation and commissioning of 623 Single and Double Roller Blinds met the highest standards. The automation control services were delivered seamlessly, and all electrical connections were executed with precision.

The successful completion of the project not only met but exceeded BMAC's expectations. Ben McCallum expressed his satisfaction, stating, "Excellence is required to ensure future major projects are achievable with our high-profile clients." Boosst EDS not only met the brief but demonstrated a commitment to professionalism, efficiency, and quality work.

Foundation for Long Term Partnership

The success of the Constitution Place project laid the foundation for a strong and enduring partnership between BMAC and Boosst EDS. Leigh Bradbury emphasised the ethos of Boosst EDS – ".....working with professionals and delivering high- quality work". The continued collaboration between the two entities highlights the reliability and trust that has been built over time.
